

AlumaDocks

AlumaDocks come in a variety of sizes to meet each lakeshore owners needs and consist of galvanized steel framework and all aluminum decking material. AlumaDocks are built to harbor boats of all sizes and are designed to incorporate boat houses to cover and protect your lakeshore investment. AlumaDock requires a barrel, a post pounder, two come-alongs, and a post puller for easy installation and removal. With the AlumaDock system you will never enter the water during installation and removal making it the easiest dock to service.

Each section of AlumaDock has the following specifications:

1. AlumaDeck

- Long lasting durable aluminum decking material for a no splinter, no cracking, no rot alternative
