

# PolyDocks

PolyDocks come in a variety of sizes to meet each lakeshore owners needs and consist of galvanized steel framework and polyethylene decking material. PolyDocks are built to harbor boats of all sizes and are designed to incorporate boat houses to cover and protect your lakeshore investment. PolyDock requires a barrel, a post pounder, two come-alongs, and a post puller for easy installation and removal. With the PolyDock system you will never enter the water during installation and removal making it the easiest dock to service.

*Each section of PolyDock has the following specifications:*

## 1. **PolyDeck**™
